## Earth Day | April 22nd

This year [EarthDay.org](#) is facilitating a focus on climate literacy, environmental justice, and a broad range of youth-led climate-focused issues, with 3 days of *Restore Our Earth* summits.

Climate change and other environmental degradations have broken natural systems, leading to new and fatal diseases as well as a breakdown of the global economy. But just as climate

change and coronavirus painfully remind us of the harm we've caused, Restore Our Earth reminds us of the opportunities that lay ahead.

We must Restore Our Earth not just because we care about the natural world, but because we live on it. Every one of us needs a healthy Earth to support our jobs, livelihoods, health & survival, and happiness. A healthy planet is not an option — it is a necessity.

Check out this [Climate Civics Toolkit](#) provided by EarthDay.org. It's flexibly designed for learners ages 8 to 18+ who want to explore ways to learn more about the local impacts of climate change and what it means to be an active participant in community civic action.
